Education

Bachelor's degree in computer science

10/2021 – 06/2025 | Cairo, Egypt

Modern Academy for computer science

Completed my 4 years as a computer science's student and graduated with a total of 3.2/4 (B degree) GPA and completed my graduation project with (A+ degree)

Skills

Programming Languages

HTML / CSS / JAVASCRIPT / TYPESCRIPT

Techniques

OOP / JWT / Responsive Applications / REST APIs /
SPA Applications / Data Structure & Algorithms /
State Management / Authentication & Authorization /
Testing / Deployment & CI/CD / MVC Architecture /
MongoDB Aggregation Pipeline / Git & GitHub / AWS
(S3 & EC2)

Frameworks & Database

React + Redux Toolkit / Tailwind / Bootstrap / NextJS /
NodeJS / Express / MonogoDB & Mongoose / Web
Sockets / Stripe

Soft Skills

Fast Learning / Teamwork / Problem-Solving /
Communication / Adaptability / Time Management
/Creativity / Critical Thinking

Projects

MKZ-Quiz

<https://mkz-quiz-frontend.vercel.app/login>

Github : <https://github.com/mkzmohanad/MkzQuiz> 

MongoDB | Express.js | React | Tailwind | Node.js | AWS (S3 & EC2)

A web platform where users can sign up, take quizzes, and track their results — all in a fast, clean, and mobile-friendly experience.

Key Features:

Interactive timed quizzes with instant feedback
Secure JWT-based authentication
Admin page for question management
Mobile-responsive design
AWS-powered storage and hosting
Real-time email notifications for verification

ArabTutorAI (Graduation Project)

Github: <https://github.com/mkzmohanad/Graduation-Project-ArabTutor> 

MongoDB | Express.js | React | Tailwind | Node.js | AWS (S3 & EC2)

A web platform where users upload local videos or selecting video from youtube and can be dubbed and summarized to Arabic using AI (Collaboration with AI team) and transfared using AWS between backend and AI

Key Features:

Dubbing and summrizing videos to Arabic

Storing and retriving videos using AWS to transfer to AI
Secure JWT-based authentication
communicating with AI using APIs
Storing videos and users data using mongoDB
Real-time email notifications for verification
